

Renewal and Expansion of Michongri Temple

based on the trend of religious secularization

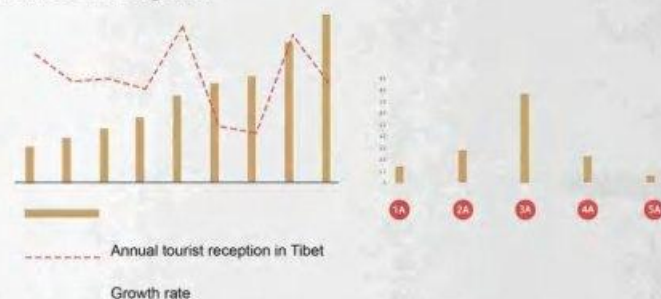

Narrative of History

Sectarian Classification

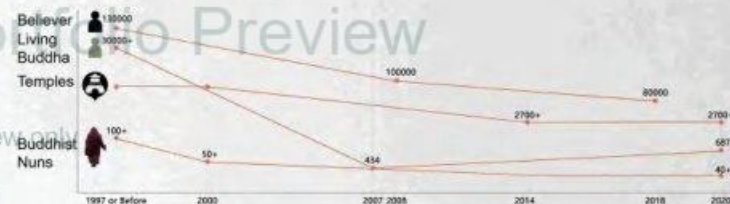

The Nyingma (Red Sect)	The Sakya (Hua Sect)	The Kagyu (White Sect)	The Kadam	The Gelug (Yellow Sect)
11th Century AD	1073 AD	11th Century Ad	1056AD	1409 Ad
The heart of the self clean, three body perfect, not fake, this from ready-made	Prevent "broken", "common", take the middle road, Fang da wise man	Pay attention to self-cultivation, major in large handprint method	Originally belong to the Kagang Gelug school of the temple, Kagang school from then on in the Tibetan area hidden	They should wear yellow hats and strictly observe the commandments. They should not interfere in worldly affairs. They should not marry or engage in productive labor
Kagyu tuo temple	The Derg Sutra Printing House	Gonggar temple		Sera monastery
Buddha hall	Dratsang(School)	Cokjam(Administration)	Khangtsen(dormitory)	Other usage

Tourists investigation

The rapid development of tourism has become an important channel for Tibetan farmers and herdsmen to increase their income. According to incomplete statistics, there are 26000 direct and 140000 indirect tourism employees in the region. 8718 farmers and herdsmen participated in tourism operation, creating 34870 non-agricultural jobs, with an annual total income of 222.57 million yuan and an increase of 6383 yuan per capita.

Background of Buddhism

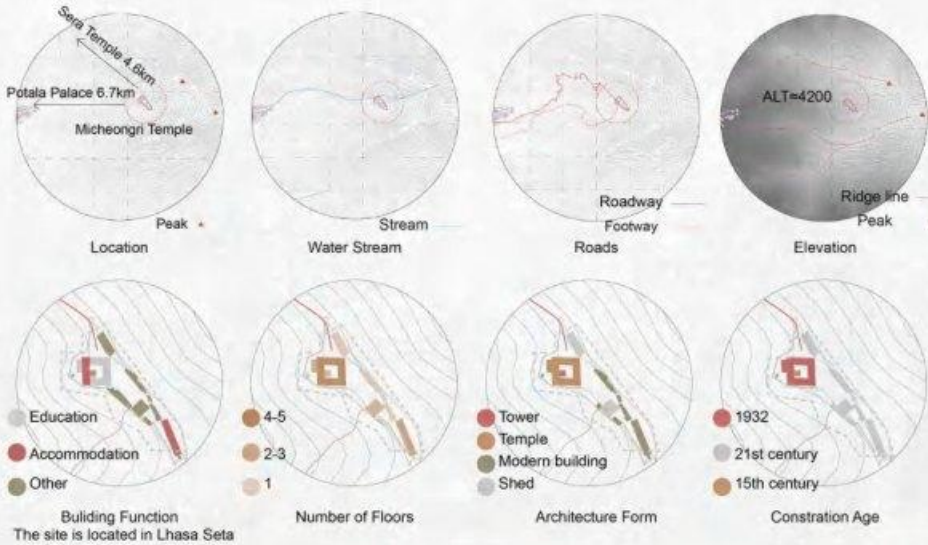

In March 1982, the Communist Party of China issued the Basic Views and Policies on Religious Issues, which set out the Party's views and policies on religious work and paved the way for the resumption of Tibetan Buddhism. With national financial support, Tibetan temples were restored and opened smoothly, yielding remarkable results. In July 1983, the Tibetan Buddhist Academy was established, creating a modern religious talent training system. To promote knowledge and self-cultivation among monks and nuns, the Gesila Jemba examination system was reinstated in July 2004, and a group of eminent monks earned the degree of Gesila Jemba.

Policy Investigation

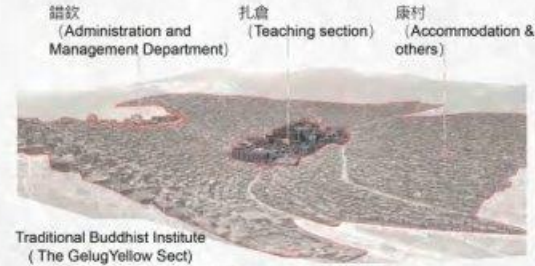

Since the 1980s, the state has allocated special funds annually for the maintenance, repair, and protection of the temple, and the central government has invested over 1.4 billion yuan in large-scale maintenance of Tibetan cultural relics and key temples. The state provided 6.7 million yuan, 111 kg of gold, more than 2000 kg of silver, and jewelry to repair the fifth to ninth Panchen stupas. For the construction of the Tenth Panchen Lama's stupa, the state allocated 66.2 million yuan and 650 kg of gold. In 1994, the state allocated an additional 20 million yuan for the restoration of Gandan Temple, and since 1995, the central government has supported the maintenance and protection of temples listed as national key cultural relics protection units through special funds, including the Potala Palace, Loblinka, and Sakya Monastery.

Site analysis

Organization structure of Gelug School

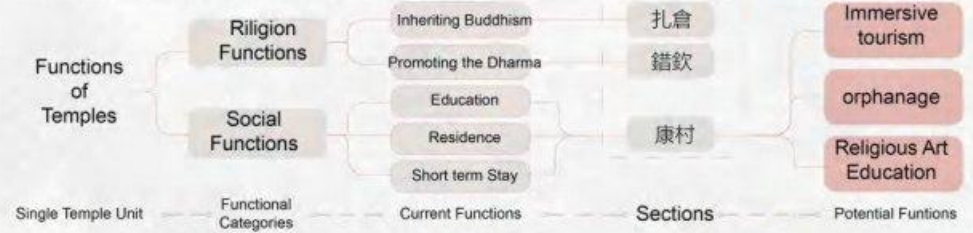

Seda Buddhist School

The Buddhist Academy of Larung Gar Monastery is located in Larung Valley, Luoruo Township, Seda County, at an average altitude of 3900 meters. It covers an area of 4 square kilometers, with the monastery complex occupying 2.35 square kilometers and the buildings covering about 1.7 square kilometers.

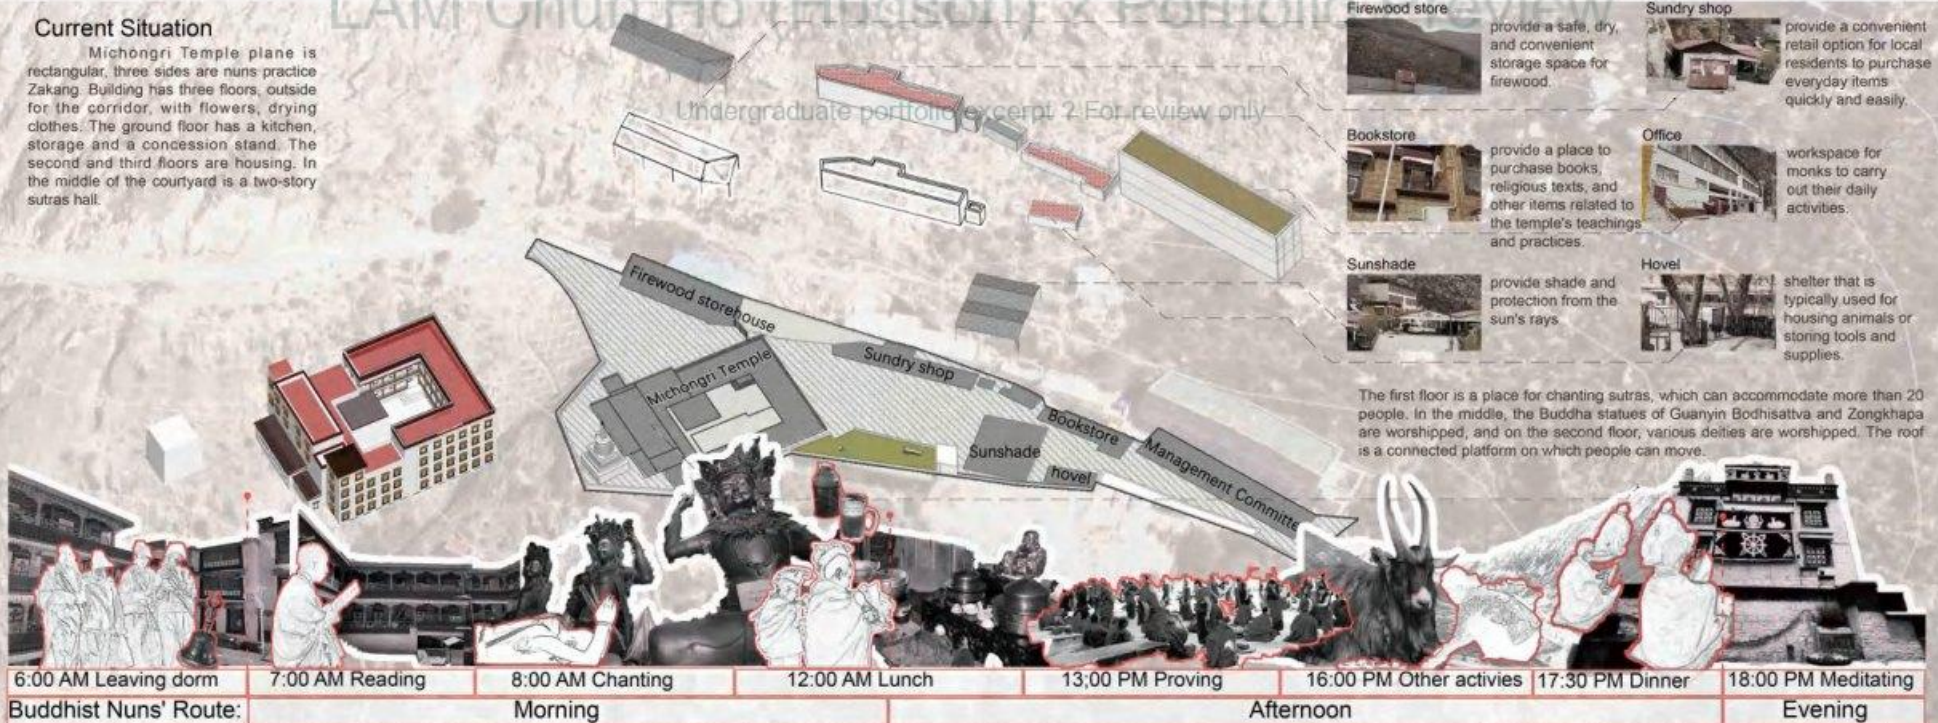

It is one of the largest Tibetan Buddhist academies in the world, with numerous monastic residences distributed densely on the slopes. Several temples and shrines are distributed throughout the valley floor and mountain ridges, and although not large in scale, they are exquisitely decorated.

The Modern Social Functions of Religion

Current Situation

Micheongri Temple plane is rectangular, three sides are nuns practice Zakang. Building has three floors, outside for the corridor, with flowers, drying clothes. The ground floor has a kitchen, storage and a concession stand. The second and third floors are housing. In the middle of the courtyard is a two-story sutras hall.

Master plan

Design description

Starting from the problem, the old temple will be transformed into a new type of Buddhist inheritance base for sustainable development by means of renewal. The geographical conditions of the original site are very bad, but it also provides a basis for Buddhist asceticism. There are institutional and structural problems in the development and inheritance of the original temple. We try to provide multiple development and sustainable revenue models for the place in the architectural space, and balance the inheritance of Buddhism and open tourism.

Formation Steps

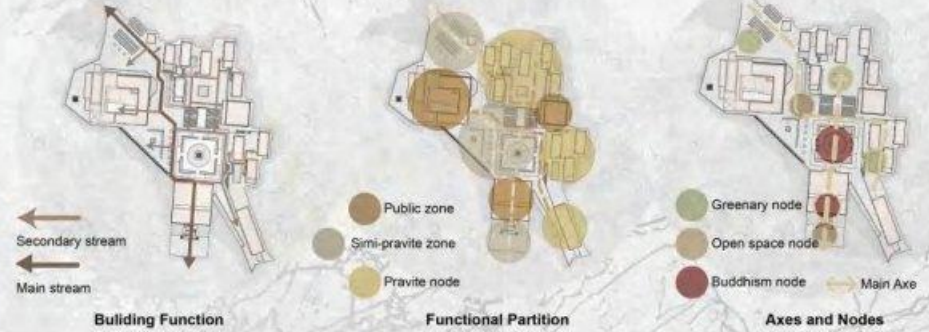

The dormitory buildings' cuboid shape nods to traditional Tibetan houses, and their unique design utilized repetition, scattering, and reduction.

1. Parking lot
2. Public Toilet
3. Nuns' dormroom
4. Old Pagoda
5. Original Temple
6. Ancient tree
7. Dining Hall/Activity room
8. Viewing Platform
9. Prayer Wheel alley
10. Pagoda square
11. Children dormroom
12. Buddha Hall
13. Administrative room/Guess room

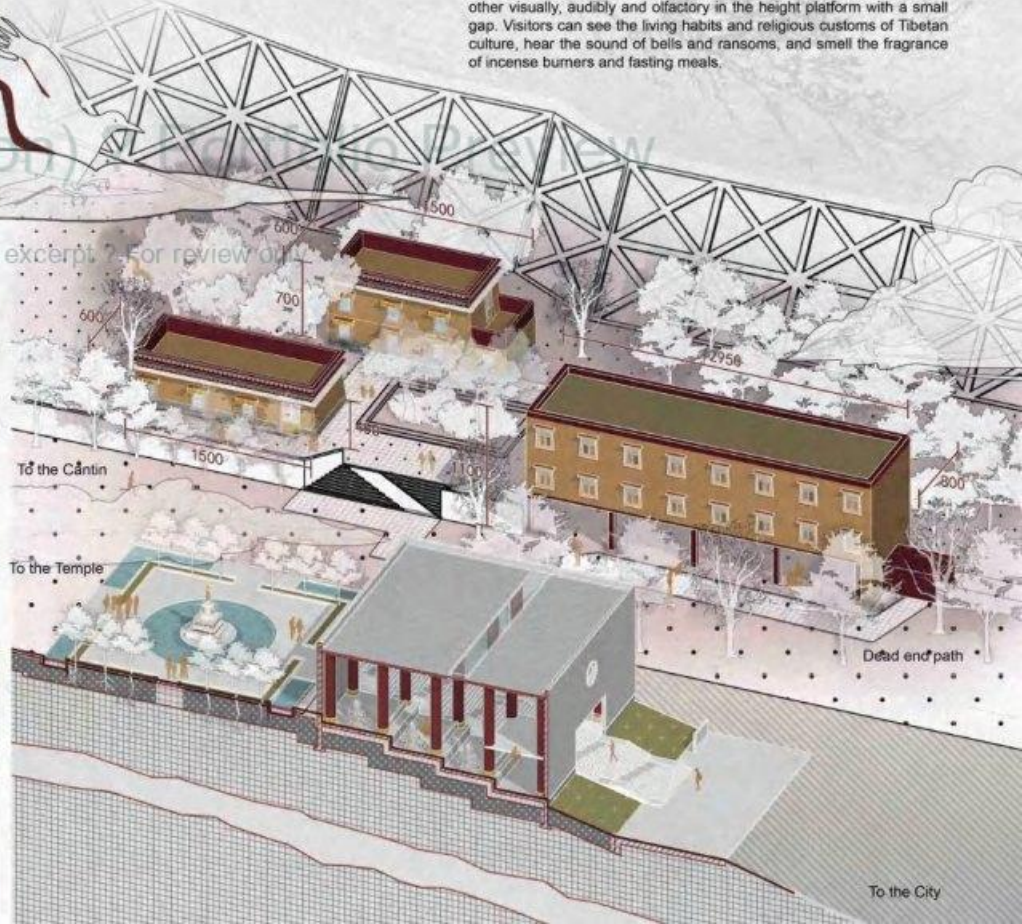

Crowd flow design

Sort out the space use rules of different groups, divide the space use function and streamline design, and avoid the uncomfortable crossover of time and space caused by inappropriate groups. The temple operation rule under the time of the day will be highly overlapping only during the meal time, which also contributes to the relative independence between the people at work and the opportunity to communicate in the leisure time.

Zoning Strategy

Depending on the elevation difference, the public and private areas are divided so that residents and visitors can use the site to perceive each other visually, audibly and olfactory in the height platform with a small gap. Visitors can see the living habits and religious customs of Tibetan culture, hear the sound of bells and rangsoms, and smell the fragrance of incense burners and fasting meals.

Wall Structure of Monk's Dormitory

Constructed using local stone material, with an upper layer and lower layer, wherein the harder and bigger stones were used for the lower layer to provide an anti-seismic force.

Tibetan style window

- Use of local materials
- Colorful decoration
- Practicality
- Harmony with nature

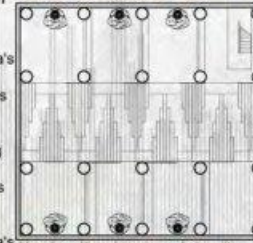

Tibetan Pagoda

- Represent Buddhist practice
- Multiple tiers for different Buddhist principles
- Crown & Spire symbolize the wisdom & compassion
- Buddhist faith & practice symbol

Buddha Hall

- Multiple Tibetan Buddhist statues:
- Pantha - Buddha's wisdom
 - Nanda - Buddha's knowledge
 - Kanaka Vatsa - Buddha's teaching
 - Kanakavatsa - Buddha's kindness
 - Ajita - Buddha's power
 - Ashvaji - Buddha's determination

Pantha Kanaka Vatsa Ajita

Simplified Tibetan Window

- Less decoration
- sliding style
- stone-made window frame
