

Neighborhood Reviving

Renovation of Unfinished Community with Local Social Sences

This project aims to transform an unfinished community into an integrated multi-functional space, offering various public services to meet the needs of residents. This plan includes creating multi-functional public spaces and specialized facilities for different demographic groups, such as a local market, modern infrastructures, green spaces, and social activity venues to facilitate interaction and community engagement. This approach breaks free from the stagnation of monofunctional ghost towns in densely populated modern urban areas. It aims to revitalize the community, fosters human development within the community, and improves mental health levels. Furthermore, it displace waste resources through a range of amenities and activities, thus resolving the issue of high vacancy rates.

problems of nowadays suburbs

High FAR residences in Dayawan new district

Dense distribution functions in new district's planning

Massive city scale with large blocks and wide roads

High-end communities with security and gated entrance.

Main cities suburban real estate projects face high vacancy rates, low usage, single functions, and a lack of community atmosphere. Improving planning, enhancing amenities, and fostering community engagement are essential to create vibrant and livable suburban areas.

/ Field Location Analysis

// Concept

| Occupations

The supply of commercial housing in Huizhou has been increasing year by year, but the increase in purchase demand cannot keep up with the increase in inventory. New houses in Dayavv Bay Development Zone in Huizhou have a high investment attribute, and most buyers buy houses as investment commodities rather than residential purposes.

Development Data Chart of the Residential Industry in a Typical Extending City

— Total sales area of commercial housing (10000 square meters)
 — Inventory (10000 square meters)
 — Construction area of commercial housing (10000 square meters)

Interactions

Neighborhood

||| Traditional nostalgia

Extracting architectural elements from **traditional architecture** in Guangdong, continuing the context of its architectural space and enabling the new space to carry the **collective memory** of local residents. Residents are more likely to develop a sense of belonging and reduce their sense of vigilance in a more familiar and intimate spatial environment.

Sector 1-1

Yoga/Meditation Room

With high stress levels and busy lifestyles, residents need a calm space for well-being. A yoga and meditation room would offer activities to relieve pressure through gentle exercise and mindfulness techniques. Community members could attend classes, build relationships and support each other's mental health in a tranquil healing environment.

Ancestral hall

It would strengthen community ties by providing a shared place to celebrate Guangdong heritage and pay respect to ancestors. Residents could come together for commemorative events that honor cultural traditions and bonds between families of different backgrounds. The space would help preserve regional identity and foster social connections.

Herbal Tea Shop

Guangdong culture places importance on herbal tea for health and socializing. A tea shop allows residents to relax and connect over locally sourced teas, continuing the rich tradition in a welcoming space. It will promote wellness through herbal remedies and build community ties.

Mahjong Room

Mahjong is deeply rooted in Cantonese culture. A dedicated room will allow residents, especially seniors, to gather regularly to play. This preserves heritage while boosting socialization and brain health. A mahjong space is vital for community, wellness and intergenerational cultural exchange.

Featured Spaces
A series of the renovative functions placed inside the high-rise residential buildings.

Indoor Farming

An indoor farming zone is needed to provide local farmers a place for their old habits and meet their spiritual needs when outdoor isn't an option. It will offer exercise space for elderly and a chance for residents to socialize. It keeps elderly socially engaged.

Cantonese Opera Stage

A Cantonese opera stage would be a social hub, bringing community members together to enjoy performances of this regional art. Young and old could experience and appreciate the tradition, connecting through shared cultural experiences. It would help preserve integral aspects of Guangdong heritage while fostering bonds between residents of all backgrounds.

Guangdong Restaurant
For tea & Dim Sum

To preserve local Guangdong culture and cuisine, a restaurant offering dim sum and famous Guangdong teas is needed. It would allow residents to socialize over shareable dishes and authentic drinks, passing on culinary traditions to new generations in a welcoming environment.
