SITE OPPORTUNITIES

KAI TAK SPORTS PARK DEVELOPMENT

The current development and construction of Kai Tak Sports Park has injected new vitality into the development of Kai Tak.

Kai Tak Sports Park provides an important venue for sports and entertainment activities in Hong Kong. The venue can accommodate nearly 100,000 people and can host various sports events, large-scale performances, exhibitions, and education and training.

HEALTHIER LIFESTYLE PRINCIPLES

Kai Tak focuses on Hong Kong's urban design principles for healthy living, which are divided into two levels: neighborhood and building, focusing on accessibility, bikeability, waterfront areas, vibrant destinations and flexible routes.

KAI TAK AIRPORT HISTORICAL VALUE

Kai Tak Airport was Hong Kong's international airport from 1925 to 1998. It played a key role in Hong Kong's economic growth and trade. As a symbol of Hong Kong's modernization, it holds memories and has great historical and cultural value.

THE SITE IS LOCATED IN THE SOUTHERN PART OF THE KAI TAK SPORTS PARK IN EAST KOWLOON, HONG KONG, WHICH WAS FORMERLY THE SITE OF THE OLD KAI TAK AIRPORT. NOWADAYS, THE KAI TAK AREA IS IN A PHASE OF COMPREHENSIVE DEVELOPMENT. IT AIMS NOT ONLY TO SHOULDER THE WEIGHT OF THE CITY BUT ALSO TO INFUSE FRESH VITALITY, PROVIDING NEW LIFE FOR HONG KONG.

THEFORE, THE FUTURE DEVELOPMENT OF OUR SITE IN THIS KAI TAK GULF AREA, WHICH FACES VICTORIA HARBOUR AND INTEGRATES PRECIOUS HONG KONG URBAN HISTORICAL MEMORIES, SPORTS AND RECREATIONAL FACILITIES, CULTURAL AND LEISURE ACTIVITIES, AS WELL AS HARBOUR NATURAL SONORITY, IS OF GREAT SIGNIFICANCE.

CONCEPT & GOAL

Creating a "Healthy Living-Work Hub"

Where Homes, Offices & Innovation Connect

01

- Shared Living And Office Space
- Construction Of Healthy Living Service Centre
- Attracting Companies In Biomedicine And Other Fields
- Student Residence

Building a "Sustainable Healthy Economy"

Drive Growth Based on Health and Innovation

02

- Establishment Of "Smart" Training Service In Health Innovation
- Development Of "Smart" Training Service In Health Innovation
- Sports Tourism Experience Zone
- Low-altitude Economy Development For Pilot Projects

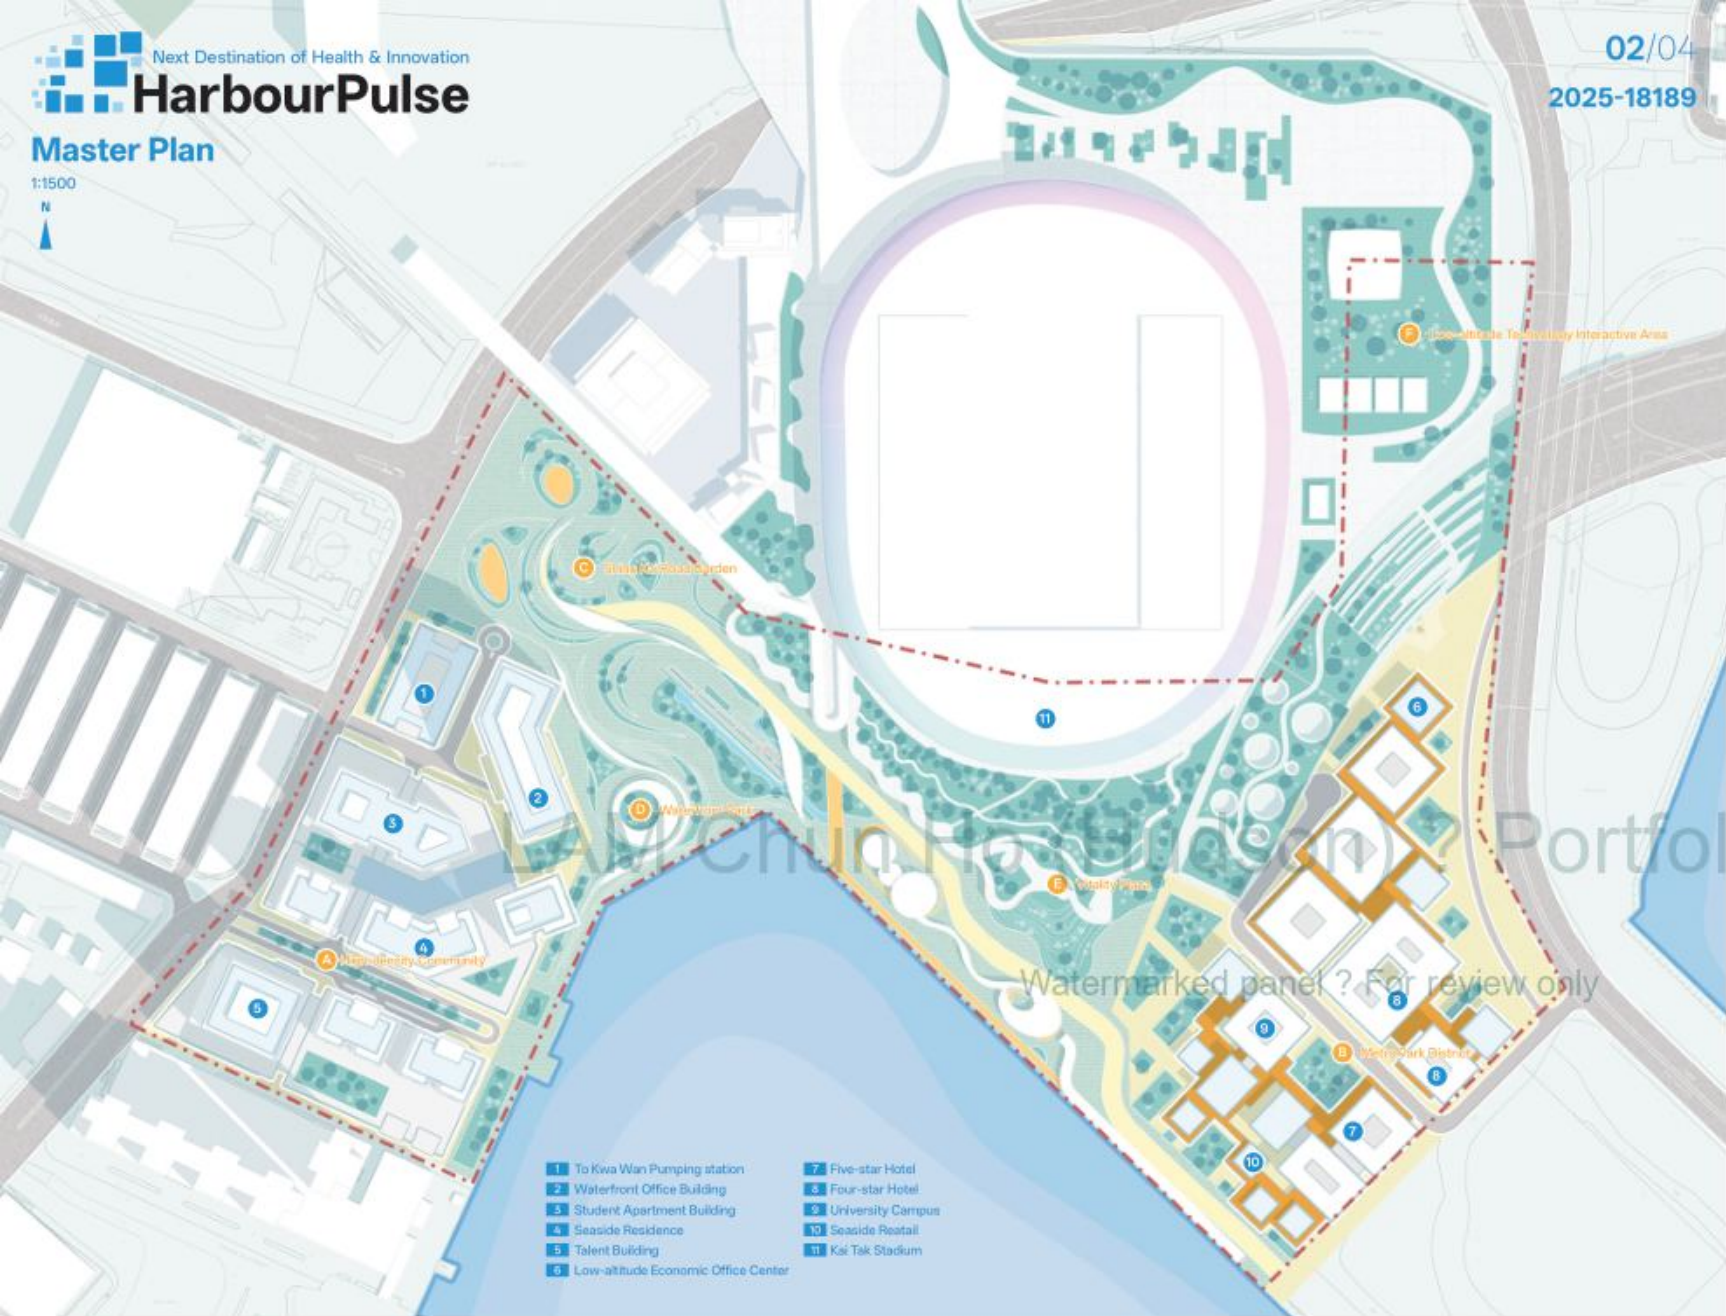

Weaving the "Kai Tak Healthy Micro Network"

Strengthening Connections Through Waterfronts & Green Spaces

03

- Waterfront Health Promenade Path Cycling
- Multi-Generational Space
- Multi-Functional Open Space
- Green Space For A Sustainable Bio-Healthy Environment

01 Site Transformation

Clear existing structures to establish a central green spine, creating a defining landscape axis that organizes the site.

02 Zoning Strategy

Implement mixed-use precincts to foster a vibrant, multi-functional community, anchored by the gateway park at Kai Tak's entrance.

03 Circulation Framework

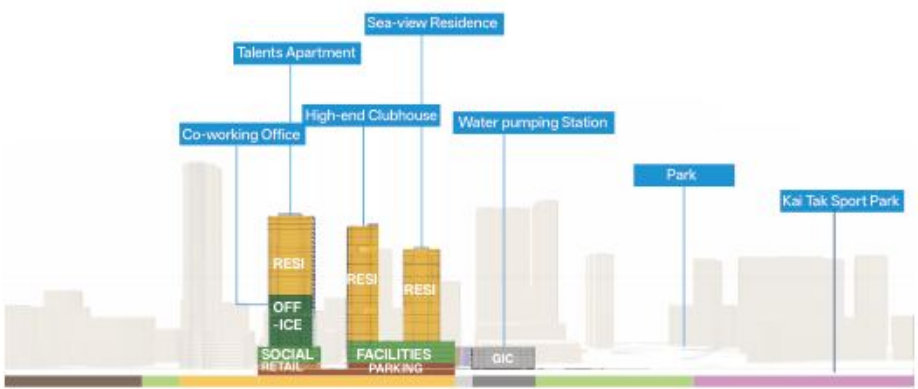

Design integrated pedestrian and vehicular networks that seamlessly connect all entry/exit points across the development.

04 Architectural Composition

Deploy innovative residential clusters that redefine community living through sustainable design and human-centric planning.

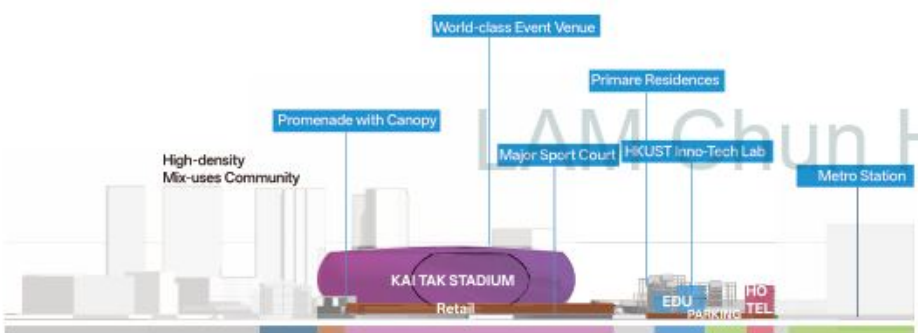

LAND USE & PROGRAM
High Density Community

Traditional High-density Mix-uses Community next to Ferry&Bus Station integrates residential, office, social, retail, Open Space and facilities, fostering a vibrant, health-driven, and innovative community hub, supporting Kai Tak Sport Park.

Kai Tak Stadium anchors a vibrant hub featuring education, hotels and retail, seamlessly integrating with HarbourPulse's health, innovation, and waterfront vision for a thriving community.
