

Shanghai Digital Valley - Art, IP & Co-Creation District

"As a flagship of Shanghai's digital economy and urban renewal, Pict Nexus transforms the riverside site into a sustainable, transit-oriented Digital Art & Entertainment IP Innovation Hub with a Cyber-Nature design language. We build a work-life-play community for Gen Z creators, integrating modular R&D labs, immersive IP spaces, and green residences. Fostering a full IP industry ecosystem, we strengthen Shanghai's global experts and creativity stores, create high-tech jobs, and blend virtual innovation with physical urban life—delivering lasting resilience and cultural value."

User mapping

Digital Creators & IP Developers

USER GROUP
This group refers to creative professionals working in digital art, game design, animation, and intellectual property (IP) development within the district. They require flexible co-working spaces, modular R&D labs, and immersive studios that support collaborative and innovative. Their schedules are fluid, often extending into late nights for project deadlines, live-streaming, or esports events. The demographic spans Gen Z and young millennials who thrive in a work-live-play ecosystem. By providing integrated live-work spaces, high-speed digital infrastructure, and creative hubs, the district attracts talent and reinforces Shanghai's global status in digital creativity and esports.

Creative Students

USER GROUP
This group refers to students from nearby digital media, game design, and esports programs seeking hands-on experience in the district's innovative ecosystem. They require affordable housing, accessible studio spaces, and opportunities to engage with industry professionals. Their schedules are structured around classes and training sessions, but often extend into late hours for game development, game practice, or tournament preparation. The age range spans 18-25, with growing demand for collaborative learning environments, exhibition spaces, and digital labs. Proximity to IP incubators and esports venues is essential for their career development.

Visitors

USER GROUP
This group refers to visitors attending immersive IP exhibitions, game launches, esports tournaments, and digital art events at the district's venues. Mature Gen Z and millennial enthusiasts who prioritize unique interactive experiences. They travel to the district for events that offer scenic dining, retail, and short-term accommodations. Ensuring seamless transport connections, diverse food and beverage options, and immersive public spaces enhances their experience and encourages repeat visits, strengthening the district's cultural reputation.

Community Residents

USER GROUP
The residential component of Pixel Nexus is designed for a new generation of urban dwellers who seek a balanced lifestyle blending digital connectivity with green spaces. Residents include young professionals, creative talent, and families drawn to the district's work-live-play environment. The community is characterized by its tech-savvy, sustainability-conscious population. Shared spaces like rooftop gardens, riverside promenades, and community digital art installations foster social interaction and a distinctive "cyber-nature" culture. The district prioritizes green experiences and inclusive spaces that serve both long-term residents and transient creative workers.

Tech & Corporate Partners

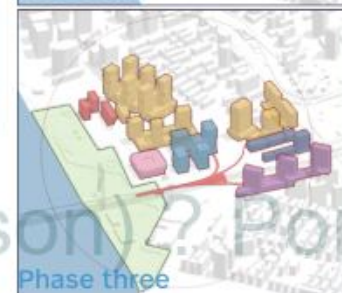

USER GROUP
This group refers to professionals employed by tech companies, game studios, IP incubators, and corporate innovation labs within the district. They include software developers, product managers, business development teams, and executives driving the district's digital economy. Their work schedules align with corporate hours but often include after-hours networking, industry events, and startup pitch sessions. The demographic spans young professionals to mid-career leaders. By providing high-quality office spaces, collaborative innovation hubs, and seamless transit access, the district supports enterprise growth, attracts investment, and solidifies its position as a flagship of Shanghai's digital economy.
